

Inspection and Quality Checklist

Global Metals. Circular Future.

Before Inspection

Agree the controlling specification, lot identity, inspector, scope, timing, sampling method, weight basis, tolerances and finality.

Material Checks

Grade, cleanliness, attachments, moisture, free liquids, fines, non-metallics, prohibited items, particle size or bale condition.

Sampling

Ensure representative access, documented sample selection, secure sample identification and retained samples where appropriate.

Weight

Agree scales, tare basis, gross and net weight evidence and tolerances.

Loading

Record container condition, number, seal number, loading sequence, photographs and inspector observations.

General information only. Transaction-specific terms are governed by signed contracts and applicable professional advice.
